

Prabhu Periyasamy

Senior Software Engineer | Freshworks

Chennai, Tamil Nadu, India — 9500358293 — prabhuperiyasamydev@gmail.com — linkedin.com/in/prabhu-periyasamy

Summary

Senior Software Engineer with 5+ years of experience designing and building scalable, high-performance applications. Expertise in backend development using Java and Spring Boot, with strong foundation in object-oriented design and backend system architecture. Hands-on experience with MySQL, Redis, Kafka, Elasticsearch, and AWS, building reliable, data-driven, and event-driven systems. Focused on developing clean, maintainable backend services, improving performance and scalability, and solving complex engineering problems.

Technical Skills

Languages: Java (Primary), Ruby

Frameworks: Spring Boot (Primary), Ruby on Rails

Messaging: Apache Kafka, Amazon SQS, Sidekiq

Databases: MySQL, Redis, Cassandra, Elasticsearch

Cloud & Tools: AWS (S3, SQS), Git, Maven, Gradle, SonarQube, Grafana, Postman

Architecture: Microservices, System Design, Event-Driven Systems, RESTful APIs

Experience

Freshworks

Chennai, Tamil Nadu, India

Senior Software Engineer

March 2023 – Present

- Implemented AOP-based Role-Based Access Control (RBAC) system, enforcing role-level access controls and enhancing system security
- Architected OAuth-based integration with Meta (Facebook & Instagram), enabling seamless social media campaign publishing from CRM platform
- Designed Kafka-based asynchronous campaign architecture, decoupling execution from request flow and improving platform reliability by 30%
- Developed scheduler-driven campaign launches with automated metric collection, processing 10,000+ campaigns monthly
- Built fault-tolerant retry mechanism using Amazon SQS delay queues, achieving 99.9% system reliability
- Developed and maintained product features using Ruby on Rails, supporting rapid development and iteration cycles
- **Technologies:** Java, Spring Boot, Ruby on Rails, Apache Kafka, MySQL, Redis, AWS

Software Engineer

April 2021 – March 2023

- Developed web form tracking feature processing 1,000+ form submissions daily and creating contacts in CRM efficiently
- Optimized performance with Redis caching and batch updates, reducing database writes by 95% (real-time to 15-minute intervals)
- Built robust Kafka consumers for efficient asynchronous event processing
- Integrated AWS S3 for secure storage of form submission data
- **Technologies:** Java, Spring Boot, Apache Kafka, Redis, AWS S3

Graduate Trainee – Software Engineer

October 2020 – April 2021

- Contributed to feature development, bug fixes, and RESTful API design using Spring Boot
- Implemented transactional email functionality, database migrations, and schema updates
- Enhanced code quality through improved logging, error handling, and test coverage
- **Technologies:** Java, Spring Boot, MySQL

Education

Sri Krishna College of Engineering and Technology

Bachelor of Technology (B.Tech), Information Technology

Coimbatore, India

2016 – 2020
